VISIT OUR PEACEFUL ECO CASA

Eres muy bienvenido

If you love the silence of the mountains, view the beautiful starry sky or meditate in our Tipi, then you can relax here.

A magical place

Our Casa was created in an old farmhouse that we have renovated. The work has been carried out using natural materials, because we want to share our love of nature with you, together with the dedication we make every day to protect the environment.

Energy-saving

The special feature of our Eco Casa is in fact ecological sustainability and energy saving, we have looked for solutions to prevent pollution of nature, our electricity is 100% solar and we use water from our own well. The water is heated by solar energy. We do not use air conditioning, but fans. In the winter we have radiators in the rooms and a wood stove in the living room. Everyone who stays here with us will experience how you can live perfectly with the sun. Thanks to our dedication, our knowledge and the use of advanced technology, we have succeeded in making our buildings self-sufficient in the field of energy.

Eco-friendliness

We have made many ecological adjustments to show you how much we care about the environment and how important our daily commitment to saving our planet is. We recycle more than 80% of our waste, use low-incandescent lamps, class A electrical appliances, environmentally friendly products and natural pesticides for our plants and vegetables in the garden and we recuperate the rainwater to irrigate our garden.

Outdoor dining

We designed the outdoor kitchen to let you enjoy simple rustic dishes from the Almeria region.

In the kitchen you will find everything needed to prepare a meal.

We have a large refrigerator A plus and an oven on gas. Bbq on gas is possible at the pool. Because the summers here are warm and dry we can not use charcoal for the Bbq, because of fire hazard. We have thought of everything: you can enjoy a quiet holiday to recharge in a place that respects your sensitivity and meets your needs.

Casa Alegria y Luna is an ecological house. We use electricity from our solar panels and water from our water well.

ADULTS ONLY: To offer our guests total peace and comfort we welcome children from the age of 14 years and up.

La Alcazaba

This Arab fortress is one of the most important Arab monuments in the country. The Moorish fortress is located in the center of the city of Almeria, where it has a beautiful view.

Sorbas

Distance from our house to 12 km, the village has a typical Arabic structure, with hills and alleys. The craft tradition and architecture, the houses are built on the rocks. Sorbas is also known for its pottery.

Almeria

The name of the city "Almería" is derived from the Arabic term AL-Mariya (mirror of the sea). Almeria with its desert landscapes in the most authentic part of Andalusia.

Places to visit

Cabo de Gata

Natural park of volcanic origin with many paradisiacal beaches and rocks where no mass tourism can be detected yet. Beautiful beaches: Las Negras, Isleta del Moro, Playa Monsul, Agua Amarga, Playa Los Muertos and so many other idyllic beaches. For divers the ideal place to spot scorpion fish, sea stars or octopuses. It is an area rich in history, culture and good food, embracing the extraordinary desert landscapes of Almeria.

Karst and Yesos de Sorbas

Is a complex of caves and underground rivers, hides one of the most stunning beauties of Andalusia. In the Cuevas de Sorbas, the wonders of the gypsum crystals, stalactites and stalagmites are revealed that manifest themselves in abundance. This is an underground world and one of the geological jewels of Andalusia. Of the famous caves, the Cueva del Agua is the largest, about eight kilometers, and the Cueva de Covadura is the deepest and reaches a depth of one hundred and twenty meters. The Cueva del Yeso and the Cueva del Tesoro, the Gypsum cave and the Treasure Cave are by far the most spectacular.

Guided tours offer access to the caves, the Gypsum cave can be visited on both the Simple Tour and the combined tour and the Treasure Cave exclusively during the technical tour. Many cavers come to

explore the caves, because they are the only ones in Europe.
